

This data sheet serves as the general characteristics of the product to customer needs. It contains individual specifications, composition and use of this material.

End wall 380*380/152 is made of PP recycled by injection moulding technology, are used for protection against mechanical damage during transportation and handling of plastic film packing units.

Technical specification:

The protectors are square, size 380 * 380mm (allowable mean deviation $\pm 5,7$ mm).

End walls 380*380/152 have a circular holder with the 152mm diameter placed in the center. (allowed deviation of the mean value $\pm 2,5$ mm).

This plastic product is made of polypropylene recycled material which is solid at room temperature.

Without the addition of metals, it is resistant to acids, lyes, salts and their solution.

In the table below is listed specification of used material:

TECHNICAL DATA

REGRANULATE PP	Composition	100% polypropylene
	Melt Flow Index	4,0 - 6,0g/10min./230°C / STN EN ISO 1133/

Terms of Delivery:

End walls 380*380/152 are packed on a pallet in the amount of 150pcs. This packaging unit contains required product information such as manufacturer's label, product name, date of manufacture.

At the request of the customer and by mutual agreement, the manufacturer may modify the packaging and to add some of the data in the labeling.
